

DALE C. DALIDA

SOC ANALYST L1 | SECURITY MONITORING | INCIDENT RESPONSE | U.S. NAVY VETERAN

Anna, TX (DFW Area) | [linkedin.com/in/dale-dalida-b32309ab](https://www.linkedin.com/in/dale-dalida-b32309ab) | github.com/DaleDalida1 | Contact via LinkedIn

PROFESSIONAL SUMMARY

Recent cybersecurity graduate and 10-year U.S. Navy veteran prepared for a Tier 1 Security Operations Center role. Hands-on academic experience includes log and network-traffic analysis, phishing investigation, incident triage, threat hunting, containment planning, and escalation documentation. Brings disciplined operations leadership, clear reporting, security-awareness training experience, and a strong foundation in protecting sensitive information.

SOC & TECHNICAL SKILLS

Security Operations: Alert triage; log analysis; incident classification; escalation notes; case documentation; evidence preservation

Detection & Investigation: Windows security events; KQL queries; phishing analysis; indicators of compromise; lateral movement; credential abuse

Tools: Microsoft Sentinel (SIEM); Log Analytics; Microsoft Defender; Wireshark; Nmap/NSE; packet capture; endpoint and network telemetry

Networking & Systems: TCP/IP; DNS; HTTP/HTTPS; SMB; Windows; Linux; Azure NSGs, Key Vault, and Storage; AWS/Azure IAM and CloudTrail concepts

Frameworks & Governance: MITRE ATT&CK; NIST SP 800-61; ISO/IEC 27035; NIST CSF; HIPAA and PHI/PII protection

Technical: Python; KQL; Random Forest classification; security reporting; SOPs; data analysis

SELECTED CYBERSECURITY PROJECTS

Azure SOC & Honeynet | Microsoft Sentinel (Personal Lab)

2024

- Built a cloud honeynet in Microsoft Azure with three internet-exposed VMs (two Windows, one Linux); forwarded Windows Security Events and Linux Syslog to a Log Analytics workspace monitored by Microsoft Sentinel.
- Analyzed 195 Sentinel incidents and 27,000+ Windows and Linux log records in a 24-hour window; used KQL to map attacker source locations and identify brute-force activity (MITRE ATT&CK T1110).
- Hardened the environment with NSGs, host firewalls, and private endpoints for Key Vault and Storage; Sentinel alerts and incidents dropped to zero in the post-hardening window, with measurement limits documented.

Incident Response & SOC Investigation | Global Synergy Solutions (Academic Scenario)

2026

- Investigated a simulated attack chain involving spear-phishing, SMB exploitation, password spraying, lateral movement, and HTTPS data exfiltration; mapped observed behavior to MITRE ATT&CK.
- Correlated Windows authentication events, documented the Five Ws, prioritized containment actions, preserved evidence, and prepared an escalation-ready incident summary.

Threat Hunting Capstone | NovaShield Analytics (Academic Scenario)

2026

- Hunted for indicators of credential abuse, insider activity, lateral movement, and ransomware across a simulated hybrid-cloud environment; translated findings into detection-improvement recommendations.
- Supported responsible-AI governance for AI-enhanced detection by identifying risks involving false positives, data quality, explainability, and analyst oversight.

Machine Learning Phishing Detection | UCI Phishing Websites Dataset (Academic Project)

2026

- Built and evaluated a Python Random Forest classifier using a stratified 80/20 split; reviewed accuracy, classification metrics, and a confusion matrix while documenting ethical and operational limitations.

PROFESSIONAL EXPERIENCE

Warehouse Manager | Healthy Home 365

Jan 2019 - Present | McKinney, TX

- Lead daily warehouse operations, coordinate loading and delivery priorities, and maintain accountability for vehicles, trailers, equipment, and inventory.
- Investigate operational discrepancies, document findings, coordinate corrective action with employees and vendors, and escalate safety or equipment risks to leadership.
- Train employees on procedures, maintain inspection and operational records, and produce clear status updates in a fast-moving environment.

CPR / First Responder Instructor | U.S. Navy

May 2015 - Oct 2018 | Multiple Commands

- Delivered structured training, evaluated readiness, maintained required records, and communicated procedures to personnel with varied experience levels.
- Developed and improved instructional procedures while maintaining accuracy, accountability, and compliance with command requirements.

Shipboard Medical Provider & Cyber Awareness Petty Officer | U.S. Navy - USS Green Bay (LPD-20)

May 2012 - May 2015

- Administered cybersecurity-awareness training for the medical department and maintained 100% training readiness, reinforcing phishing, social-engineering, password, and information-handling practices.
- Protected sensitive medical information and maintained accurate operational and training documentation in a high-tempo shipboard environment.
- Coordinated with command personnel to resolve readiness and compliance issues and briefed leadership on program status.

Hospital Corpsman | U.S. Navy

May 2009 - May 2012 | Corpus Christi, TX / Afghanistan

- Provided medical support and maintained sensitive records while operating under strict privacy, accountability, and documentation requirements.
- Worked effectively under pressure in deployed and clinical environments requiring sound judgment, teamwork, and timely escalation.

EDUCATION

Bachelor of Applied Technology, Information Systems - Cybersecurity | Collin College

Conferred May 15, 2026 | Frisco, TX

Associate of Applied Science, Information Systems Cybersecurity | Collin College

Aug 2021 - Aug 2023 | Frisco, TX

Cybersecurity Infrastructure Technician Certificate | Collin College

2023 | Frisco, TX

MILITARY SERVICE

U.S. Navy | Hospital Corpsman, HM2 (E-5) | May 2009 - Oct 2018 | Honorable Discharge

Previously held a Secret security clearance during military service.
